

Every toolbox talk, every language, with a record.

Site notices reach every operative in their own language, subcontractors included, with a record of who confirmed.

A toolbox talk in English, signed on a sheet, is thin evidence when much of the gang reads Polish or Romanian. TeamTalk puts the notice on every operative's phone in their own language and records who confirmed it, subcontractors included.

WHAT IT DOES

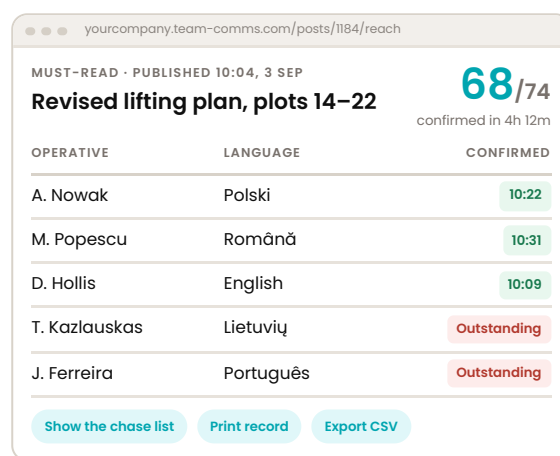

- ✓ Every operative reads the notice in their own language. Posts translate on publish, captions included.
- ✓ Must-read notices need a confirmation tap, offered only after the whole notice has been on screen.
- ✓ The reach report shows who confirmed and who has not. The chase list hides everyone who has.
- ✓ A printable per-person record shows the notice, the language read and the time confirmed. CSV export too.
- ✓ Subcontractors join in one break by scanning the QR join card. Leavers are locked out on their leaving date.

The join card. Scan it, enter a number, you are on.

The translated notice. The site notice on a phone, in Polish, sent in English.

The reach report. Confirmed, not confirmed, and the chase list.

PER SITE

£180

per site per month on an annual plan: everyone on the site, up to 100 enrolled workers, however many languages, with the records.

£2,160 a site for the year. Above 100 workers on a site, £1,60 each per month; monthly billing is 15% more. Everything is included, implementation is always £0. For a whole region the Company plan covers unlimited sites from £550 a month. Ex VAT, 12-month term.

START HERE

A 60-day pilot, £2,500 fixed.

Up to 3 sites and 250 enrolled workers, 100% credited against year one. **The fee is refunded only if both criterion 1 and criterion 2 are missed:** 70% logged in within 14 days, and 85% confirmed within 72 hours. The measurement rules are agreed in writing first.

PROOF AND COMPLIANCE

Regulation 15(8) of CDM 2015 puts the duty to give workers appropriate instructions and information on every contractor on site, not only the principal contractor. Section 40 of the 1974 Act reverses the burden on the reasonably practicable limb, so it is your job to show you did enough. **A per-person, timestamped, language-stamped confirmation is evidence towards that. It is not a defence on its own and nobody should sell it to you as one.**

What it is not. It is not a rota, an induction or competence system, a RAMS tool or document control, and machine translation is good for notices but not for legal wording without a human check. Data is held in the United Kingdom (AWS London, eu-west-2).

“Which of your sites has the most languages on it right now?”

25 minutes on a real phone. I will tell you honestly if it is not useful.
