

Every notice, every language, with a record.

A safety notice reaches every worker on site in the language they read, and you get a timestamped, printable record of who confirmed it. Workers sign in with a phone number: no work email, no app store.

WHAT IT DOES

- ✓ **Phone-number login.** A worker types their mobile and a texted six-digit code. No email address is needed to add anyone, and a sign-in lasts 30 days.
- ✓ **Translated on publish.** You write one notice in English. Every worker receives it in their own language, video captions included. They choose their language once.
- ✓ **Confirmed receipt, with the record.** Must-reads need a tap to confirm, offered only once the whole notice has been on screen. You get a printable per-worker record and a CSV export, included on every plan.
- ✓ **A whole site on in one break.** Print a join card with a QR code and pin it on the welfare cabin door: about 20 seconds a worker. Set a leaving date and access is revoked.
- ✓ **Reporting back from site.** A photo, a sentence and a location in under a minute, written in the worker's language and translated on arrival.
